EDUCATION

DePaul University

Expected: May 2028

Master of Science in Human-Computer Interaction

University of Illinois Chicago (UIC)

May 2026

Bachelor of Science in Computer Engineering, Minor in Mathematics

SKILLS

Programming Languages: TypeScript, HTML/CSS, JavaScript, Python, C/C++, Java, SQL, R

Tools & Frameworks: React, Vite, Tailwind CSS, Figma, Git, GitHub, VS Code

EXPERIENCE

Restaurant Manager

March 2022 – Present

Buffalo's Grill (Family-Owned Restaurant)

Sycamore, IL

- Manage front-end operations for a family-owned establishment, handling daily reporting and customer engagement to maintain the restaurant's reputation for authentic service.
- Maintain daily logs of total revenue and sales volume, ensuring accurate data capture for end-of-day financial reconciliation.
- Oversaw inventory organization and restocking operations to ensure consistent supply availability across daily service.

PROJECTS

OpenCall — SparkHacks (2nd Place Overall)

February 2026

- Collaborated in a team to build a match-based talent platform, replacing traditional social metrics with a custom "creative alignment" logic.
- Engineered a "cinematic" web interface using **TypeScript and Tailwind CSS**, implementing a role-based onboarding flow and high-fidelity theatrical visual elements.
- Translated abstract design concepts into a functional prototype with a swipe-and-shortlist interface, managing version control via GitHub.

Affline Music Device — Senior Design Project

August 2025 – April 2026

- Awarded **Best Table at Expo** by UIC College of Engineering (April 2026), selected among 5 winners out of 31 competing senior capstone teams.
- Developed a custom GUI in C/C++ for a portable music device, including recent and album view built for an ILI9341 display.
- Implemented USB file transfer (MTP) to enable drag-and-drop music management between the hardware device and a computer.

TechnoLuna

March 2026 – Present

- Designing and developing a bilingual ed-tech platform using **React and Vite** to introduce Hispanic youth to technology concepts through gamified interactive learning.
- Conducting user research through educator interviews to inform classroom-ready features including a teacher dashboard and progress tracking system.
- Architecting a cosmic-themed UI featuring custom CSS animations and responsive design patterns optimized for elementary and middle school engagement.
